

Road Lighting Fixture

INFINITY[®]

0612 Times Road Light

Smart Energy Lamp

Features

The lamp shade adopts Pyrex with good light penetration and less penetration loss.

Designed by the foreign expert, the reflector is extruded from pure aluminium board, the surface of vacuum plated metal results in more reflected efficiency and more rational distributive curve.

The lamp fixture, lamp cover and the gear box are aluminium die-casting with power coating, which is anti-corrosive and of great performance.

The structure is connected by the reflector and the lamp glass cover, which increases the dustproof performance. It can keep the dust and the insect out of the lamp shade, with its reasonable structure and reliable seal, the IP reaches 65 or above.

Lamp and Fixture Installation

1
Demount the screw of the shell and open the clasp.

2
The light cover can be pulled out with the fall of the little axis after turning the light cover up to 90 degree.

3
Unscrew the glass cover and the board of the reflector, take the reflector out.

4
Install the light source.

5
Put the light cover back to its original place, buckle the light cover and the shell, screw the bolt.

6
Open the cover of the gear box.

7
Feed the wire and insert the lamp pole through the opening and install the lamp shade.

8
Press down the cable line with the cable plate, fasten the bolt after finishing the connection of the wire and covering the plate.

9
Turn the fixture around, fasten the bolt of the Lightpost installment hole, press down the lightpole and fasten the bolt.
